Seif El-Deen Amr

Software Developer

Pyramids Gardens, Giza, Egypt • 01055496208 • seifah1234@gmail.com • LinkedIn

Summary

Software Engineer with hands-on experience developing business-oriented software solutions, including POS systems, Inventory Management, HR applications, and internal management tools. Proven ability to build reliable, scalable, and user-friendly desktop, web, and mobile applications. Strong background in working with real clients, analyzing business requirements, and translating them into effective technical solutions. Continuous learners **with a strong focus on** analytical and technical problem-solving skills**, system architecture** expertise**, and AI** experience**, aiming to deliver high-quality software products and contribute to building a technology-driven company that creates real business value.**

Work Experience

Jan 2023 – PRESENT

.Net developer | Original I.B.S Company | Giza, Egypt

- Developed and maintained business-oriented desktop applications, improving operational efficiency for **5+ client branches** and automating daily workflows.
- Managed full software development lifecycle, including requirements analysis, system design, database development, implementation, reporting, and deployment, delivering **5+ production-ready systems**.
- Built advanced **WPF desktop applications** with clean architecture, handling **10,000+ daily transactions** reliably.
- Designed and optimized **SQL Server and Sybase databases**, executing complex queries and reporting, improving data retrieval speed by **30%**.
- Work on layered, data-driven architectures enabling **real-time data processing** across multiple branches.
- Integrated systems using APIs and system-to-system communication, reducing manual data entry by **40%**.
- Created interactive and automated reports and dashboards for business decision-making, enabling **faster reporting cycles by 50%**.

Key Projects: HR & Attendance System, Retail POS System, Clinic & Pharmacy Integrated System

NOV 2025 – Present

Trainee | DEPI | Cairo, Egypt

- Contributed to AI-driven and software solutions, delivering **3+ practical projects** combining software engineering and AI concepts.
- Analyzed requirements and designed system workflows for **team projects serving 50+ users**.
- Build software components improving process efficiency by **up to 25%**.
- Participated in research and experimentation in technical problem-solving, system design, and AI, continuously improving technical skills and delivering **measurable outcomes**.

Projects

POS & Inventory Management System

- Developed a full-featured **retail POS system** managing **500+ daily transactions**, invoices, inventory, and branch operations.
- Implemented using **C# .NET WPF** with **SQL Server / Sybase** backend, reducing manual processing time by **35%**.

HR & Attendance Management System

- Built an **HR & Attendance application** to automate employee time tracking for **100+ employees**, including complex attendance scenarios like night shifts.
- Integrated **biometric device logs** and relational databases, reducing errors and manual processing by **40%**.

Skills

Technical Skills: .NET Framework • WPF • ASP.NET MVC • REST APIs • SQL Server • Sybase ASE • Database Design & Optimization • OOP • Desktop Application Development • Web Application Development • API Integration • Reporting & Dashboards • Technical Problem-solving • Git & Version Control

Soft Skills: Team Collaboration • Leadership • Presentation

Education

SEP 2023 - present

Bachelor of Computers and Artificial Intelligence | Cairo University

3.28 GPA • Class Leader
